

# BH 147S

## Seed Highlights

- Conventional Sorghum-Sudangrass
- Wide area of adaptation
- Very good regrowth following harvest
- Above average sugarcane aphid tolerance rating

Characteristics	
<b>Maturity Group</b>	<b>Medium</b>
<b>Photoperiod Sensitive</b>	No
<b>Male Sterile</b>	Yes
<b>Midrib Color</b>	White
<b>Midrib Type</b>	Normal
<b>Anthracnose Rating</b>	NA

1-5 rating, 1 = Very Tolerant

Recommended Primary Usage	
<b>Silage</b>	
<b>Hay</b>	X
<b>Grazing</b>	X

Recommended Planting Rate (lbs./acre)	
Dryland	10-30
Irrigated	35-80

All ratings presented represent relative differences between B-H Genetics® hybrids. This information is not intended for use in comparison with hybrids from other companies. Adverse environmental conditions, cultural practices, disease and insect pressure, can affect the relative accuracy of the ratings and product descriptions.

**CAUTION:**

Sorghum-Sudangrass and Sorghum products can develop prussic acid or elevated nitrate levels under certain conditions. Avoid single, heavy nitrogen applications, especially prior to or during drought periods. Do not graze very young plants, plants recovering from drought, or plants damaged by a frost or freeze.

This is a partial listing of B-H Genetics® products. Contact your B-H Sales Rep or your local B-H Dealer for information on additional products available from B-H Genetics®.
