

PEARL

Seed Highlights

- Excellent plant canopy and standability
- Large kernel size with enhanced protein content
- Excellent foliar disease tolerance
- Strong non-preference to sugarcane aphids

Characteristics	
Maturity Group	Late
Photoperiod Sensitive	No
Male Sterile	No
Midrib Color	Cloudy
Midrib Type	Normal
Anthracnose Rating	2

1-5 rating, 1 = Very Tolerant

Recommended Primary Usage	
Silage	X
Hay	
Grazing	

Recommended Planting Rate (lbs./acre)	
Dryland	4-8
Irrigated	6-10

All ratings presented represent relative differences between B-H Genetics® hybrids. This information is not intended for use in comparison with hybrids from other companies. Adverse environmental conditions, cultural practices, disease and insect pressure, can affect the relative accuracy of the ratings and product descriptions.

CAUTION:

Sorghum-Sudangrass and Sorghum products can develop prussic acid or elevated nitrate levels under certain conditions. Avoid single, heavy nitrogen applications, especially prior to or during drought periods. Do not graze very young plants, plants recovering from drought, or plants damaged by a frost or freeze.

This is a partial listing of B-H Genetics® products. Contact your B-H Sales Rep or your local B-H Dealer for information on additional products available from B-H Genetics®.

Forage Sorghum Products
