

BH 122PSB

Seed Highlights

- BMR-6 Sorghum-Sudangrass
- Wide area of adaptation
- Very good regrowth following harvest
- Photo-period sensitive
- Above average sugarcane aphid tolerance

Characteristics	
Maturity Group	PPS
Photoperiod Sensitive	Yes
Male Sterile	Yes
Midrib Color	Brown
Midrib Type	BMR-6
Anthracnose Rating	NA

1-5 rating, 1 = Very Tolerant

Recommended Primary Usage	
Silage	X
Hay	X
Grazing	X

Recommended Planting Rate (lbs./acre)	
Dryland	15-35
Irrigated	35-50

All ratings presented represent relative differences between B-H Genetics® hybrids. This information is not intended for use in comparison with hybrids from other companies. Adverse environmental conditions, cultural practices, disease and insect pressure, can affect the relative accuracy of the ratings and product descriptions.

CAUTION:

Sorghum-Sudangrass and Sorghum products can develop prussic acid or elevated nitrate levels under certain conditions. Avoid single, heavy nitrogen applications, especially prior to or during drought periods. Do not graze very young plants, plants recovering from drought, or plants damaged by a frost or freeze.
